

## **Environmental Policy Statement**

At M J Mapp we are committed to improving our environmental awareness and performance and introducing best practice, while becoming more environmentally responsible as a business. We endeavour to do this without compromising the quality of our services to our clients.

We are aware that as a property and facilities management company our daily activities have an adverse affect on the environment, both directly and indirectly. These activities have been identified and we have developed and implemented policies and procedures that have, and will in the future, ensure that their impact is minimised, and wherever possible, eliminated. These procedures will warrant continual improvement of our environmental performance, which will be audited internally and externally. Any procedures not resulting in an improved performance will be amended and improved in order to ensure advancement.

We shall ensure compliance with all relevant environmental legislation and regulations and take action to continually improve our environmental performance across all our activities, products and services.

We will measure the performance of our company through the following indicators:

- Staff awareness training on environmental matters;
- Reducing, reusing and recycling waste;
- Identifying how much energy we consume, where we consume it and implementing no-cost and/or low-cost solutions to reduce consumption;
- Monitoring energy use and implementing solutions to reduce consumption;
- Increasing the use of recycled materials within our office operations;
- Choosing sub-contractors and suppliers that are environmentally aware and encouraging non-conforming sub-contractors and suppliers to consider the development and implementation of Environmental Policies;
- Improving environmental risk identification and management.

This policy statement forms part of our Environmental Management System.
